

# IMPORTANT SAFETY INFORMATION READ AND FOLLOW ALL SAFETY INSTRUCTIONS

### FOR FIELD ASSISTANCE PLEASE CALL +1-213-255-2060 #4

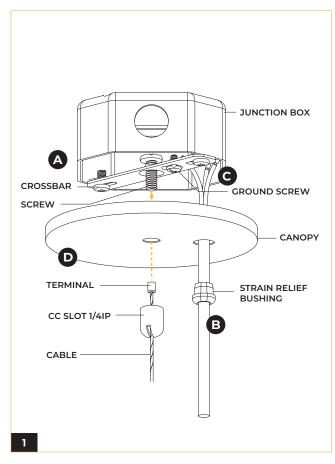

- Before wiring to power supply and during servicing or relamping, turn off power at fuse or circuit breaker.
- · All servicing or relamping must be performed by qualified service personnel.
- Product must be grounded to avoid potential electric shock or other potential hazard.
- Product must be installed at locations and heights, in a manner consistent with its intended use, and in compliance with electrical code and local codes.

## **VELA 4** SLOPED ADJUSTABLE CABLE

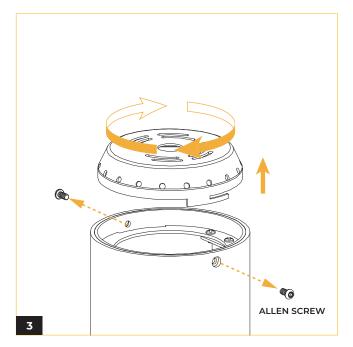

- (A) Secure the crossbar to the 4" octagonal box (by others) designed to support the weight of the fixture.
- (B) Lock the strain relief bushing to the power cord with allowance for wiring connections, and thread the power cord through the canopy wire hole.
- (C) Connect the Green ground conductor to the ground screw on the crossbar, the line voltage to the Black conductor, and the neutral to the White conductor. For 0-10V dimming option, connect the two remaining conductors (Date+ to Purple conductor and Data- to Gray conductor).
- \* Make all connections with UL approved connectors.
- (D) Thread the cable through the coupler with the terminal side on top. Slide the coupler up to the canopy and secure with the screw on crossbar.

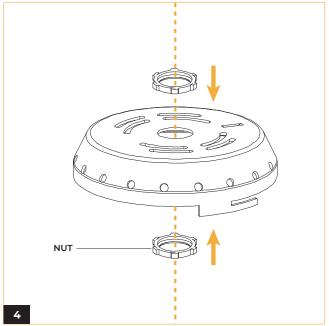

- (E) Insert the cable through the gripper and plunger. Trim off extra cable using cable cutting tool. To adjust the cable to desired length, press the plunger.
- (F) Fasten Powerfeed tube and Powerfeed tube connector. Secure gripper with Powerfeed tube, then feed cord through Powerfeed tube.

# VELA 4 SLOPED ADJUSTABLE CABLE

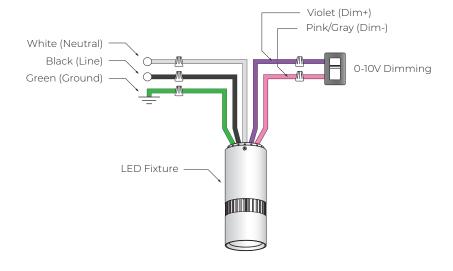

Screw lid to powerfeed tube with one nut on each side of the lid. Attach cylinder fixture to lid and secure allen screws.
